The Future of Education

How likely is it that schools for children and teenagers will be predominantly online in the future? What are the advantages and disadvantages of online education for students in the coming years?

Vocabulary

- | | |
|----------------|---------------|
| 1. probability | 5. functional |
| 2. substitute | 6. voluntary |
| 3. institution | 7. curriculum |
| 4. attendance | 8. educate |

Scenario 1: The Good Old Days

Student A and Student B are talking about their school days and what was it like going to school when they were kids.

Scenario 2: Making the Most of School

Student A's son/daughter does not seem to be enjoying school. Student B gives advice on why that might be and what can be done.

Schools do not contain enough life lessons and have outdated curriculums.

Share a story about something that happened during your school or college days.
